**RE: Draft Confirmatory Sampling Report, Area of Concern F, Naval Station Mayport,
USEPA ID #FL9 170 024 260, Mayport, Florida, (Tetra Tech NUS, Inc., May 2009)**

Dear Mr. Symes:

I have completed my review of the subject document which was dated May 2009 and was received on May 29, 2009. This document presents the findings of the confirmatory sampling activities completed at Area of Concern (AOC) F. The primary objective of the confirmatory sampling was to provide data to identify the presence of contamination at AOC F and to determine if further investigation is necessary. In order to achieve this primary objective, soil and groundwater samples were collected and analyzed. Based on the results of the confirmatory samples an RCRA Facilities Investigation (RFI) has been recommended to completely characterize and delineate the horizontal and vertical extent of contaminants in the soil at AOC F. FDEP concurs with this recommendation. Also, based on the findings of the RFI, it is agreed that an Interim Measure may be warranted to remove soils impacted with contaminants of concern at concentrations greater than FDEP soil cleanup target levels.

Thank you for the opportunity to review this document. If you require additional clarification or other assistance please feel free to contact me at 850/245-8999.

Sincerely,

John Winters, P.G.
Remedial Project Manager
